Subject: Lead Service Line Inventory (LSLI) Status Update – Initial Submission Approval
SARATOGA WATER DISTRICT, PWS ID# 76300, Island County

Dear Purveyor,

We are writing you in follow-up to your Lead Service Line Inventory (LSLI) submission, which was due October 16, 2024. Thank you for completing and submitting your LSLI.

We have reviewed your initial LSLI submission and determined that it meets all required elements and is thereby complete and approved – no further action is needed at this time.

Please note: The EPA finalized the Lead and Copper Rule Improvements on October 30, 2024, which expands the requirements for the LSLI. We expect that your current, initial LSLI will need to expand to include at least the connector materials for each reported service line by Fall 2027. We will provide additional communications and guidance this year to assist with completing these anticipated, new requirements.

Thank you again for your work in meeting requirements for Lead and Copper Rule, and please feel free to reach out with any questions or concerns at LCRRassistance@doh.wa.gov.

Best regards,

Matthew Hadorn
