Client Sample Results

Client: NW Natural Water Services, LLC
Project/Site: Saratoga - Coliform

Job ID: 110-11534-1

Client Sample ID: 2742 Saratoga Rd

Lab Sample ID: 110-11534-1

Date Collected: 05/27/26 16:20

Matrix: Drinking Water

Date Received: 05/28/26 16:05

PWSID Number: 763000

Method: SM 9223B - Coliforms, Total, and E.Coli (Colilert - Presence/Absence)

Analyte	Result	Qualifier	RL	Unit	D	Analyzed	Dil Fac	Analyst
Escherichia coli	ABSENT			NONE		05/28/26 18:22	1	MA
Coliform, Total	ABSENT			NONE		05/28/26 18:22	1	MA

Action Limit Summary

Client: NW Natural Water Services, LLC
Project/Site: Saratoga - Coliform

Job ID: 110-11534-1

Client Sample ID: 2742 Saratoga Rd

Lab Sample ID: 110-11534-1

PWSID Number: 763000

Compliance Check

The results obtained from the analytical testing of this data set were checked against compliance limits received from the client. Any results at or above the compliance limits have been highlighted for your convenience.

Analyte	Result	Qualifier	Unit	EPAMCL	RL	Method	Prep Type
				Limit			
Escherichia coli	ABSENT		NONE	Present		SM 9223B	Total/NA
Coliform, Total	ABSENT		NONE	Present		SM 9223B	Total/NA

SAMPLING INSTRUCTIONS

Visit our website www.EdgeAnalytical.com or follow the QR code to view an instructional video on taking your bacteria sample. Or call us at 800-755-9295.

SAMPLING BOTTLE:

The bottle you will need for sampling is a 125mL bottle. This bottle is sterile! Avoid opening it until needed. Handle with the greatest of care to avoid contaminating your sample. The bottle contains a white pellet or fine powder; this is normal and is a chemical used to neutralize excess chlorine in the sample.

Hold cap in hand while filling. Do not touch the inside of the cap or bottle.

Sample Must be at 100ml or slightly above.

Air space is essential. Pour out excess before replacing cap.

COLLECTING PROCEDURE:

- 1) Collect sample from a non swivel household faucet in regular use. Avoid outside faucets to minimize environmental contamination.
- 2) See figure 1 below for tap or spigot samples.
- 3) See figure 2 below for Pond / Reservoirs / Swimming Pool, or River.
- 4) Do not sample hot water
- 5) Avoid sampling through hoses.
- 6) Remove any screens, filters or aerator devices from your faucet and allow the water to run for several minutes.
- 7) Direct well samples: Pump out 5 to 25 pails before taking sample.

Figure 1 - From Tap: Hold cap in one hand while filling the sample bottle with the other.

Figure 2 - From Pond/Reservoir/Swimming Pool or River. Hold cap in free hand while filling. Move bottle with a continuous forward sweeping motion. Avoid large debris if possible.

Please Read Carefully to Avoid Unsuitable Samples:

- For drinking water bring your samples in within **24 hours** of sampling.
- For surface water bring your samples in within **8 hours** of sampling.
- If sampling after chlorine disinfection, make sure the system has been thoroughly flushed and water does not smell of chlorine.
- Sample bottles will often have plastic or paper seals on the cap; carefully remove this seal without touching the insides of the container.

Find a drop off location near you.
